

Comparison Of Intraosseous Versus Central

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins ☆

Comparison of intraosseous versus central venous vascular ...

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins Bernd A. Leidela ,c *, Chlodwig Kirchhoffb, Viktoria Bognerb, Volker Braunsteinb, Peter Biberthalerb, Karl-Georg Kanzb a Department

Comparison of intraosseous versus central venous vascular ...

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins. ...

(PDF) Comparison of intraosseous versus central venous ...

INTRODUCTION Current European Resuscitation Council (ERC) guidelines recommend intraosseous (IO) vascular access, if intravenous (IV) access is not readily available. Because central venous catheterisation (CVC) is an established alternative for in-hospital resuscitation, we compared IO access versus landmark-based CVC in adults with difficult ...

Comparison of intraosseous versus central venous vascular ...

EMA did their best to alert their subscribers of this prior to the merge with EM:RAP on Oct. 1. We apologize for any inconvenience. Per the merge with EM:RAP, you will now have ample opportunity to earn CME credits.

EMA - Comparison Of Intraosseous Versus Central Venous ...

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins. Download. Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins . Chlodwig Kirchhoff. Karl-georg Kanz. V. Braunstein. Bernd Leidel ...

(PDF) Comparison of intraosseous versus central venous ...

ORIGINAL CONTRIBUTION CPR, sodium bicarbonate, routes of administration, comparison sodium bicarbonate, administration, comparison of routes Comparison of Intraosseous, Central, and Peripheral Routes of Sodium Bicarbonate Administration During CPR in Pigs Obtaining venous access continues to be one of the most difficult problems faced by a ...

Comparison of intraosseous, central, and peripheral routes ...

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins. Resuscitation . 2012 ; 83 (1): 40 - 45 .

A Comparison of the Effects of Intraosseous and ...

The purpose of this study was to compare the IO access as a bridging procedure versus central venous catheterization (CVC) for in-hospital adult emergency patients under resuscitation with impossible peripheral intravenous (IV) access. We hypothesised, that CVC is faster and more efficacious compared to IO access.

Is the intraosseous access route ... - PubMed Central (PMC)

Comparison of intraosseous versus central venous vascular access in adults under resuscitation in the emergency department with inaccessible peripheral veins. Resuscitation. 2012; 83 (1):40-5. doi: 10.1016/j.resuscitation.2011.08.017.

Use of intra-osseous access in adults: a systematic review

For patients' safety reasons, current American Heart Association and European Resuscitation Council guidelines recommend intraosseous (IO) vascular access as an alternative in cases of emergency, if prompt venous catheterization is impossible. The purpose of this study was to compare the IO access as a bridging procedure versus central venous ...
